## Instructions 71550 A/C HOSE CRIMPER

**WARNING**

**WEAR  
SAFETY  
GOGGLES!**

# A/C HOSE CRIMPER 71550

## PRE-OPERATION SET-UP

- Crimper can be mounted to a work bench or held in a vice.

**READY TO GO!**

**WARNING**

**Wear Safety Goggles**

## OPERATING INSTRUCTIONS

**Warning: DO NOT tighten the crimper without having a hose and fitting in place to crimp. This could damage the tool. Also, be careful not to place hands near any pinch points while using the tool!**

1. Remove pin and open top yoke.

**\*Note: It may be necessary to turn the arbor screw counter clock-wise until top yoke can be opened.**

2. Select correct die set:

### Standard Hose

#6 (5/16") - Purple

#10 (1/2") - Yellow

#8 (13/32") - Red

#12 (5/8") - Green

**\*Note: Be sure to use correct size die set! Failure to do so could cause leakage or failure of the crimp!**

3. Insert dies into yoke.
4. Place the fitting and hose in crimper and close top yoke.
5. Insert pin securely.

**\*Note: Make sure pin snaps securely into place before crimping process is started.**

6. Position the hose fitting into the center of the dies.
7. Turn the arbor screw clockwise until the bottom of the yoke ram meets the finish line (approximately 1/8" from the bottom yoke).
8. Check crimp for correct compression; continue to tighten screw if additional compression is required.

**\*Note: Never use impact or power drivers.**

9. Once crimp is complete, turn arbor screw counter clock-wise until it stops.
10. Remove holding pin and open yoke.
11. Remove hose assembly.
